

Conforma Clad™ Protected Screw Elements

Extend the Life of Screw Elements by up to 5x.

- Maintain Critical Screw/Barrel Clearances**
 Cladding is metallurgically bonded to the base material of screw flights greater than 3/16". Manufactured to meet your specific barrel tolerances, resulting in improved process control.
- Optimize Outputs and Physical Properties**
 Maintaining screw/barrel clearance ensures consistent extruder performance, consistent shear rates, consistent extrudate temperatures, and consistent physical properties.
- Formulated Specifically for Use with WPR-29® Barrels**
 Maximize screw and barrel compatibility with Conforma Clad tipped screw elements.
- Available through OEMs and After Market Suppliers**
 Request Conforma Clad tipped screw elements from your OEM or contact Kennametal for a list of OEM providers.

Leading edge of flights are clad
